EXERCISE AND RECOVERY	)	(415) 433-4150

Honorable Commissioner of Patents  
and Trademarks  
Washington, D.C. 20231

Sir:

Pursuant to the guidelines for Information Disclosure Statements published in 37 C.F.R. 1.97 through 1.99, effective January 20, 1983, the applicant lists references herein and on the attached form PTO-1449 which may be relevant to the subject matter of the above-identified application. A copy of each listed reference is attached. The Examiner is requested to make these citations a part of the official record in this application.

Remarks

The above-identified application discloses and claims a novel method and nutritional supplement composition employing at least one lactic acid salt to improve a mammal's fluid, electrolyte and carbohydrate balance during exercise and subsequent recovery.

The citations listed below may be material to the examination of the above-identified application, and are, therefore submitted in compliance with the duty of disclosure defined in 37 C.F.R. 1.56.

Many of these references were cited in the Background Art section of the present application. While the applicant discussed what was perceived to be the general relevance of each listed reference therein, the Examiner is respectfully requested to examine each reference and make an independent assessment of its relevance to the present application.
